## New paint kit is really up to scratch

LOSE minor paint chips and save yourself a few pounds on bodyshop repair costs with the Quixx Scratch Removal System. The pack comprises sandpaper, cloths and two tubes of polishing paste. Simply rub down and polish the affected areas and watch the marks vanish. We found that the kit worked well on lacquer scratches, although anything deeper first required the attention of a touch-up brush.

The £8.95 system is available online at [www.halfords.com](http://www.halfords.com) or from leading independent motor accessory stores. Call 01454 312831 for more info.

Kit removed our lacquer scratch marks
